**Andre Pfleger Joins hep as
Head of Portfolio Management**

**Infrastructure Expert Strengthens
Institutional Investor Segment**

Güglingen, October 19, 2023 – On October 1, 2023, Andre Pfleger joined hep, international specialist for solar parks and solar investments, as Head of the Portfolio Management team.

Infrastructure Expert Strengthens Institutional Investor Segment

Following eleven years as Senior Investment Manager for Alternative Investments at SV SparkassenVersicherung, Andre Pfleger brings a lot of experience from institutional asset management on the client side as well as proven expertise in infrastructure investments. He is pleased to be closer to the value creation of the assets through his decision for hep and to be able to offer attractive investment opportunities to different investor groups with the objective of a sustainable and successful energy transition. The decision for hep was easy for the 47-year-old Swabian. “The vertical integration of hep, meaning the coverage of both project development, construction, operation and financing of solar projects, in several markets clearly sets the company apart from other providers in the industry.”

Heiko Szczodrowski, CEO of HEP Kapitalverwaltung AG, is pleased to have won Andre Pfleger for hep. “Our team will benefit from Andre's infrastructure know-how, network and client-side experience. Together, we will drive our growth in the institutional capital investment sector as planned.”

Investing Responsibly with hep

HEP Kapitalverwaltung AG operates as a fund management company specializing in solar investments. It was founded in 2012 and has been approved as an AIF capital management company since January 24, 2018. Even before the approval as a KVG according to the German Investment Code, hep specialized in the asset class “renewable energies” since its foundation in 2008.

With hep's current investment fund, investors invest in solar projects in the target countries USA, Japan, the EU (especially Germany) and Canada. The fund is designed in accordance with Article 9 of the EU Regulation on sustainability-related disclosure requirements in the financial services sector and its economic activities are in line with the Taxonomy Regulation. As a result, it meets the highest sustainability requirements currently available on the European market.

Andre Pflieger, Head of Portfolio Management at HEP Kapitalverwaltung AG
